Detailed Action

Response to Amendment

Claims 1-2, 4-7, 9-21, and 23-34 are pending. This action is in response to the amendment received January 4, 2006.

Response to Arguments

The rejection of claims 1-2, 4-7, 9-21, and 23-34 under 35 U.S.C. 103(a) as being unpatentable over Bowen et al. (US 6,094,649) in view of England et al. (US 6,144,991) is maintained.

Applicant's arguments filed January 4, 2006 have been fully considered but they are not persuasive.

In response to the arguments concerning the previously rejected claims the following comments are made:

A.) In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

B.) Applicant alleges that the prior art made of record fails to teach a plurality of web pages of the respective web site W. The examiner disagrees with applicant's representative since Bowen teaches a plurality of web pages of the respective web site W (col. 4, line 20 to col. 5, line 24; fig. 3). In other words, Bowen discloses a Web site is a collection of Web pages maintained by an entity such as a college, university,

government agency, company or individual. Web pages and web sites are linked together via telecommunications networks and communication paths using various physical transmission media to form the WWW. For example, in a web site of a university there are numerous web sites within that particular university site. Thus, a student can extract information from that web site that contains many other web sites.

With regards to the claims rejected as taught by Bowen and England, the examiner would like to point out that the reference teaches the claimed limitations and thus provides adequate support for the claimed limitations. Therefore, the examiner maintains that Bowen and England taught the claimed limitations.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
